Brief introduction of your research experience:

I have been engaged in teaching and management for a long time in Colleges and universities, and have carried out a wide range of research work in the aspects of "Two Courses", "PE Teaching" and "party and political management". In the past 30 years of work experience in the University, I have been guiding our engineering discipline research team for a long time. In the past 10 years, I have made in-depth explorations in the fields of lifelong learning sports for all, and college students' innovation and entrepreneurship. It has undertaken many scientific research projects, such as the Capital Institute of Physical Education, Beijing Education Commission, China Adult Education Association, and the special research fund of central universities. The current research focuses on the integration of electric power and fitness.
