

Brief CV

Name	CHEN Junwen	中文名	陈俊文	
Gender	Male	Title (Pro./Dr.)	Engineer	
Position (President...)		Country	China	
University/ Department	China Petroleum Engineering & Construction Corporation, Southwest Branch			
Personal Website				
Research Area	Oil & Gas Gathering and Transmission Area			

Brief introduction of your research experience:

8 years' research, engineering and EPC experience within the Oil and Gas surface upstream projects, both onshore and offshore.

Skilled in professional theory and solution for special study, such as flow assurance, dynamic flare simulation, pipeline stress analysis, pipeline strength and stability study, thermal radiation and dispersion simulation, and et al.

Adept at the typical software for oil and gas engineering (Process Simulations (Aspen HYSYS, VMGsim)/ Stress Analysis (Caesar II) / Process Hazard Analysis (PHASt) / Dynamic Simulation (SPT OLGA) / Pipeline Network Study (Pipeline Studio, PIPESIM) / Flare Network Study (Aspen Flare System Analyser) / Offshore Pipeline Design (DNV Pipeline Engineering Tool/ OFFPIPE/ PRCI OBS))

Work scope including design, construction and commission of onshore and offshore gas gathering system.
